PROFILE

MSc student in Computational Biology and Bioinformatics at the University of Göttingen, with a background in bioengineering, quantitative image analysis, and statistical modeling. Experienced in building Python-based pipelines that extract spatial and morphological features from biological imaging data, from endoscopic tissue images to fluorescence microscopy, and translate them into disease-relevant classifications. Interested in extending this pattern to drug discovery and AI in healthcare.

EDUCATION

Oct 2025 – present

MSc Computational Biology & Bioinformatics

University of Göttingen, Germany

Coursework: Machine Learning, Statistics, Bioinformatics Pipelines, Python & Linux, Data Science, Neurobiology

Sep 2021 – Jun 2025

B.Tech Bioengineering

VIT Bhopal University, India

GPA: 9.3/10 · Gold Medal - Batch Topper, 1st Rank

Coursework: Molecular Biology & Genetic Engineering, Computational Biology & Analytics, Medical Imaging & Data Analysis, Cancer Biology

EXPERIENCE

Sep – Dec 2026

Research Intern - Clinical Image Analysis & AI

Center for Digital Surgery, University Medical Center Göttingen (UMG)

- Working with a CE-NBI clinical endoscopy dataset of subepithelial vascular patterns in vocal fold tissue to extract quantitative features for AI-based classification of benign lesions vs. laryngeal cancer
- Building and validating Python-based image analysis pipelines for automated vascular pattern characterization to support clinical decision-making

Apr 2026 – present

Student Research Assistant (HiWi)

Institute of Physical Chemistry, University of Göttingen

- Designed gene-silencing experiments; analyzed cytoskeletal dynamics (NM2A, β -actin, actin-myosin) via fluorescence microscopy
- Built Python pipelines for quantitative image analysis of cell mechanics data

Aug – Nov 2024

Research Intern - Bioprocessing & Renewable Energy

Naval Materials Research Laboratory (DRDO), Ambarnath, India

- Optimized microbial fermentation for H_2 production from food waste; quantified yields via gas chromatography across iterative experimental cycles
- Managed multi-variable parameters (pH, temperature) as part of a 4-person research team

Nov – Dec 2023

Research Intern - Molecular Diagnostics

Chittaranjan National Cancer Institute, Kolkata, India

- Performed RNA/DNA extraction for clinical cancer diagnostics; maintained patient sample documentation per lab protocols
- Co-authored a published narrative review on EGFR overexpression, mutations & treatment strategies (May 2025)

SKILLS

Computational	Python (pandas, NumPy, scikit-learn, PyTorch), R (tidyverse, ggplot2), Java, Machine Learning / Deep Learning, Bioinformatics pipelines, Statistical analysis
Laboratory	DNA/RNA extraction, Bacterial culture, Gas chromatography, Fluorescence microscopy, Gene silencing, Antibody staining, Gel Electrophoresis
Languages	English (C1, fluent), German (A2, actively learning), Bengali (native), Hindi (native)

PUBLICATIONS & ACHIEVEMENTS

May 2025	Publication - Co-authored narrative review on EGFR overexpression, mutations & treatment strategies
Oct 2025	Gold Medal - 1st Rank, B.Tech Bioengineering Batch Topper, VIT Bhopal University
May 2023	1st Place - Debate on Genetic Engineering Ethics; 3rd Place - Scientific Poster on Biomimetic Architecture (RABVIT 3.0)
